PROFILE

Computer Science graduate and Full-Stack Developer skilled in .NET Core, C#, Angular, and SQL. Experienced in building responsive web applications, integrating frontend and backend technologies, and following Agile methodologies. Passionate about problem-solving and continuous learning.

EDUCATION

Bachelor's Degree in Computer Science

2020 – 2024 | ismailia, Egypt

suez canal university

Grade: Excellent with Honors

Graduation Project: Cross-Platform Medical Society System (Grade: Excellent)

INTERNSHIPS

.NET Full-Stack Development Track Trainee

12/2024 – 03/2025 | ismailia, Egypt

Information Technology Institute (ITI), Ismailia Branch

- Intensive training on .NET Core, ASP.NET, Angular, Entity Framework Core, and RESTful APIs
- Built full-stack projects, including CRUD operations and JWT authentication.

PROJECTS

Airbnb Clone 🔗

- Graduation project at ITI simulating Airbnb functionalities.
- Developed secure RESTful APIs using ASP.NET Core and Entity Framework Core.
- Built a responsive frontend with Angular for listing, booking, and user dashboards.
- Implemented user authentication, role-based access, and booking system logic.

Bug Ticketing System 🔗

- API Development: Built a modular RESTful API with ASP.NET Core, documented via Swagger.
- Applied Clean Architecture to separate layers (API, Services, Domain, Infrastructure).
- Implemented Repository + Service patterns for testable, maintainable data access.
- Standardized API responses/errors using Result Pattern for consistent client handling.
- Secured endpoints with JWT and role-based authorization.
- Automated email workflows (confirmation/password reset) using MailKit.
- Optimized performance via EF Core with SQL Server for relational data.

ITI Examination System (Windows Forms, ADO.NET, SQL Server) 🔗

- Created a Windows Forms application utilizing ADO.NET to interact with a SQL Server database.
- Implemented a three-tier architecture for enhanced scalability and maintainability.
- Designed and optimized database schemas using normalization techniques.
- Developed complex stored procedures for CRUD operations and advanced functionalities.

Social Media Platform (Angular) 🔗

- Developed a full-stack social media application using Angular with dynamic CRUD operations for posts, comments, and likes.
- Integrated JWT authentication to manage user sessions and secure routes.
- Implemented Guards and Interceptors for route protection and HTTP request handling.
- Built a User Profile feature enabling data updates and account deletion.

Medical Society System (MSS) (React Native, Expo, IoT, AI)

- Built a cross-platform mobile and web application using React Native and Expo.
- Integrated IoT technology to measure real-time heart rate data.
- Implemented OCR (Optical Character Recognition) for automatic data extraction.
- Developed an AI-powered chatbot for user support and interaction.

TRAINING

- Problem Solving 

2020 – 2024 | alexandria, Egypt

ECPC (Egyptian Collegiate Programming Contest):
Received intensive training in competitive programming, algorithms, and data structures. Enhanced problem-solving skills and algorithmic thinking through participation in programming challenges.
- Software Development & Database Training

08/2023 – 09/2023 | ismailia, Egypt

Suez Canal Authority
Intensive summer training focused on C#, .NET, and PL/SQL. Gained practical experience in building console applications, writing SQL queries, and developing basic database-driven systems.
- C++ Programming & Game Development Training 

10/2022 – 11/2022 | ismailia, Egypt

Ministry of Communications in collaboration with ODC & AMIT
Intensive training on C++ programming fundamentals and object-oriented concepts. Developed interactive games and activities to apply problem-solving and algorithmic skills.

VOLUNTEERING

- Trosc, Faculty of Computers and Information

2022 – 2023

Head of Information Technology
 - Led team activities and training sessions on databases, frontend development, and OOP.
 - Guided students in learning technologies and fostering teamwork.

SKILLS

- Backend Development

.NET Core, ASP.NET, ADO.NET, RESTful APIs, Linq, Entity Framework
- Databases

SQL Server
- Software Development Concepts

OOP, Database Normalization, Three-Tier Architecture, Clean Architecture
- Methodologies:

Agile (Scrum)
- Design Patterns

Repository Pattern, Service Layer, CQRS, Singleton Pattern, Factory Pattern, Dependency Injection, Observer Pattern, Decorator Pattern
- Frontend Development

Angular, HTML5, CSS3, Javascript, Bootstrap
- Version Control

Git, GitHub
- Programming Languages

C#, JavaScript, TypeScript, SQL, Python
- Problem Solving

Strong analytical and debugging with experience in data structures, algorithms, and optimizing code performance
- Soft Skills

Leadership, Team Management, Problem Solving and Critical Thinking

LANGUAGES

- Arabic – Native/Bilingual
- English – Proficient
